

Terraamera

TerraNeem[®] EC

Insecticide | Fungicide | Miticide | Nematicide

Terraamera's TerraNeem[®] EC is a powerful broad-spectrum bio-pesticide. Specially formulated from high-quality cold pressed neem oil, TerraNeem[®] EC has over 150 bioactives, including azadirachtin.

TerraNeem[®] EC is effective on a wide variety of pests and insects and suitable for many crops. But don't just take our word for it, hear what our growers are saying.

What Growers Are Saying:

We used TerraNeem[®] EC on our vegetable farm in Southwest Michigan in 2018. We made the decision that we would use biological pesticides rather than conventional pesticides as our standard practice.

We applied 6 ounces of TerraNeem[®] EC to control potato beetle. On our squash and melons we used 5 ounces in two applications to control a high infestation of squash bugs.

For late planted multi-colored corn 3 ounces of TerraNeem[®] EC in three applications controlled earworm.

We were able to control downy and powdery mildew better than we have over the last three years with TerraNeem[®] EC.

Our plan is to continue the use of TerraNeem[®] EC. We have gotten excellent control of insects and fungi and our customers seem to really appreciate the quality of our vegetables.
